<center>*Assignment – 2*
Introducing Relational Databases.</center>

1) Which field of the Customers table is the primary key?

→Cnum is the field of the Customers table that is the Primary Key.

----

2) What is the 4th column of the Customers table?

→ Rating is the 4th column of the Customers table.

----

3) What is another word for row? For column?

→i) Another word for row is a) Tuple

                                 b) Entity

                                 c) Opportunity

ii) Another word for Column is a) Attribute

                                    b) Method

                                    c) Key

                                    d) Field

4) Why isn't it possible to see the first five rows of a table?

In the Customers table, the query uses 'select * from customers', so that it shows all rows of the table, but if you want to see only the first five rows of the table, you have to give the query as per the requirement.
